CRYPTO POCKET

Deck Investor

Index

¿What is CRYPTOPOCKET?

FIAT/CRYPTO PAYMENT PLATFORM

Payment gateway fiat to crypto / crypto to fiat (ramp-on / ramp-off) for the purchase and sale of cryptocurrencies in pre-sale and post-listing phases.

GAS-FEE AND CONTRACT

Gas-fee is sent to users together with the purchased tokens.
We add token contract to simplify the process.

NO CUSTODY

We facilitate and guide users to be the custodians of their own crypto-assets.

SOLUTIONS

We provide solutions to any blockchain project for the management and development of its platform and users.

Problem

It is not possible to purchase cryptocurrencies or NFTs in the pre-sale or low capitalization phase directly with FIAT (euros)

Difficulty to enter the crypto ecosystem and loss of users interested in Blockchain projects

There is a wall in Web3 and cryptoeconomics projects that prevents the adoption of projects that are useful, social, and have great interest for the community
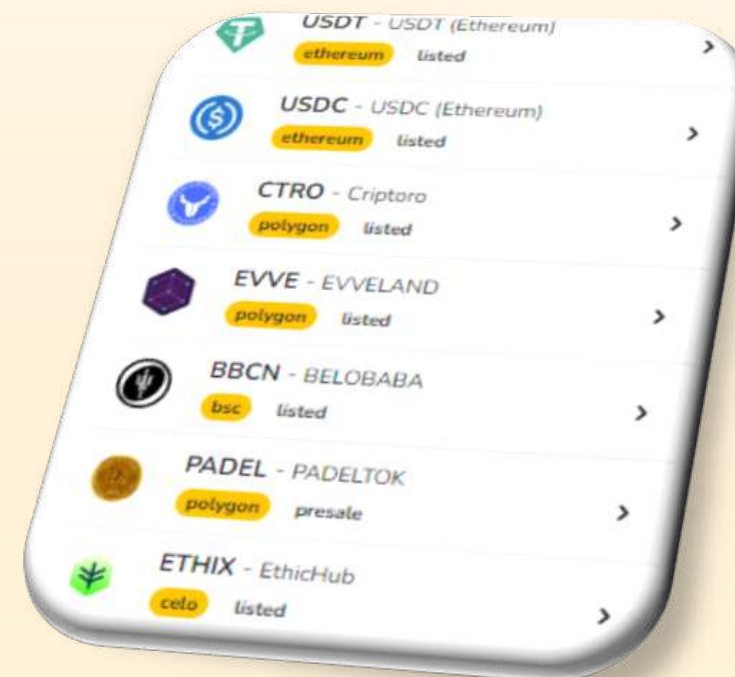

Solution(s)

Purchase with FIAT of cryptocurrencies and NFTs in pre-sale phase

Purchase with FIAT of cryptocurrencies listed on DEX

Automatic gas-fee injection when purchasing

Custom integration on demand of the projects

Token listing on our platform and visibility for blockchain projects in their earliest stages

Value proposal

WE AVOID THE COMPLICATED PROCESS OF ENTRY INTO THE CRYPTO ECOSYSTEM:

- Open an account in CEX
- Create wallet
- Fear of not having custody of your assets
- Buying token from native blockchain for gas-fee
- Incorporation of a contract to avoid scams

The user can buy his crypto-assets on out platform

The user can buy his crypto-ssets inside his metaverse or game

The user can buy their crypto-assets on their Web 3 plataform or website

Market size

TAM
845 billion euros of cryptocurrency transactions in Europe in 2022*

SAM
60 billion euros of cryptocurrency transactions in Spain in 2022*

SOM
1% of SAM: 6 million annual profit in transactions. (CRYPTOPOCKET)
